

R9 DNP: fit 120 ohm only at physical CAN bus ends.
J2.1 is +5 V POWER INPUT for a powered programming clip.
Do not connect a programmer VTREF pin to J2.1.
Y1 ESR80/CL12, C13/C14 must be qualified on prototype.
Absolute angle requires two-track calibration and firmware.

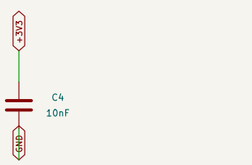

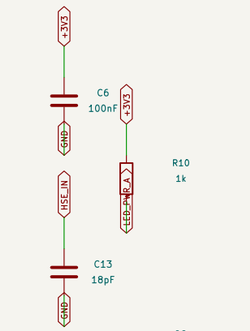

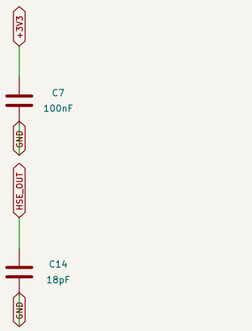

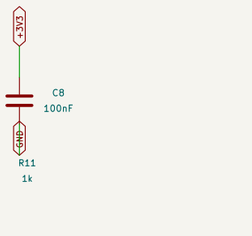

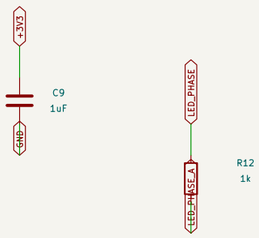

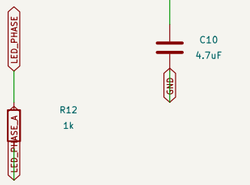

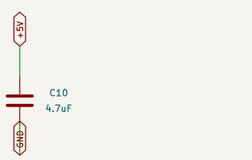

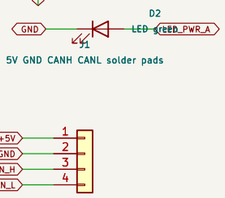

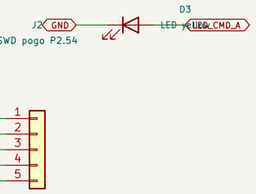

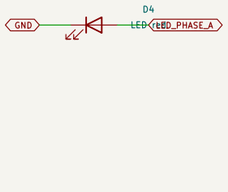

5 V input; 3.3 V logic; 2 x TMAG5273A2; 4 layers / 0.8 mm
